Capabilities

Icon Plastics is a privately owned and operated Australian business employing approximately 250 staff. Operating for over 50 years the internal strengths and opportunities have cemented Icon's place in the Australian plastics conversion market. Both viable and diversified, Icon is in good stead to continue growing in the future.

Icon's ability to meet customer requirements and quality expectations have earned us the reputation of a supplier that can be counted on.

OUR STORY

About grow baby

40 years ago we developed a BPA free baby bottle so innovative that it was the foremost choice of leading Australian and New Zealand neonatal nurseries. Fast-forward 4 decades and millions of feeding products later and Icon Health is still one of the largest suppliers of BPA free baby bottles and accessories to maternity hospitals nationwide and overseas.

Being a leader in the design and manufacture of plastic health care products, our next mission was to fill a retail gap and provide parents with the same quality of product they used and trusted in maternity wards. From hospital to home, our expanding baby care and feeding requirements range GROW was born. Proudly Australian owned and operated, we invite you to try our products and come on the ever advancing journey with us.

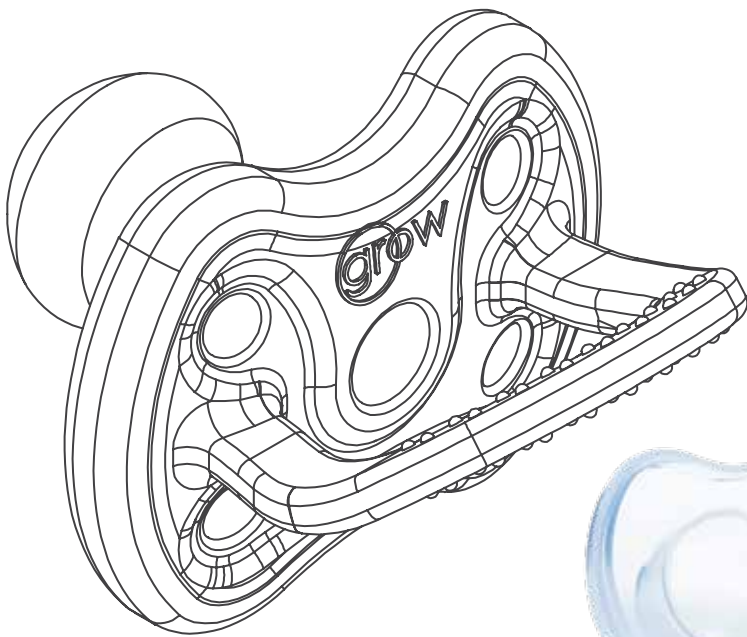

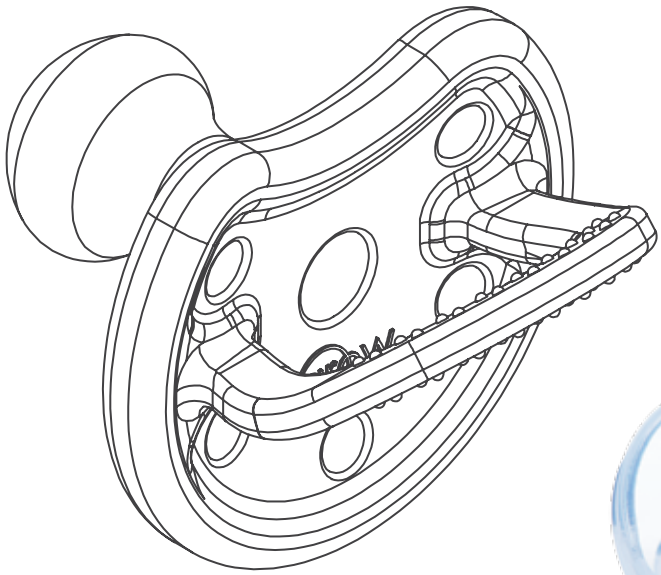

About Icon plastics

Icon Plastics is 100% Australia owned company with more than 40 years of experience as manufacturing specialists in blow-moulded, injection and extruded profiles, catering to a broad range of national and international industry sectors.

Much more than a simply a manufacturer with global reach and quality certifications (TS 16949:2008 and ISO 9001:2008), Icon Plastics provides a unique 'concept to completion' service; from collaborative concept design through to testing and costing to manufacture, branding and packaging, and delivery through our extensive integrated networks. In-house screen-printing is available to brand containers and closures with specific artwork, or we can work collaboratively to design, test, create and brand to your specifications and requirements.

Our highly skilled team of professionals ensure through innovative and quality customer focused service that Icon Plastics simply is the best choice for superior plastics solutions.

BPA FREE

What is BPA?

We never have, we never will.....

***Icon Health's baby feeding bottles
have always been **BPA FREE!*****

Bisphenol A (BPA) is a common industrial chemical used in manufacturing to make poly-carbonate plastic resins, epoxy resins, and other products which can be found in some baby feeding products, sippy cups and everyday food and water containers.

BPA is an endocrine disrupting chemical which mimics the sex hormone oestrogen. Serious health effects clinically advised to be linked to Bisphenol A include infertility, problems with reproductive development, thyroid malfunction, neural and behavioural development in foetuses, infants and children, onset of early puberty in girls, obesity, breast and prostate cancer, diabetes, thyroid malfunction and a range of attention disorders.
